(1) Registered trade mark.

Generic type of construction product and use

External Thermal Insulation Composite Systems (ETICS) with rendering on mineral wool.

This Guide relates to stomixTHERM beta, an ETICS intended for use as an external insulation on walls of buildings. The walls are constructed of masonry or concrete with a reaction to fire classification of A1 or A2-S2, d0 according to EN 13501-1 : 2007.

Basis of this Guide

This Guide gives information supporting the CE Marking to enable the system to be incorporated satisfactorily into the construction works according to UK requirements. This Guide must be read in conjunction with the CE Marking and its accompanying information.

It covers regulatory compliance and voluntary aspects where appropriate. The presentation by the manufacturer of the information underwriting CE Marking has been taken as valid and requiring no further corroboration in accordance with the Construction Products Directive.

A Declaration of Conformity against the relevant technical specification has been provided by the manufacturer and as a condition of the issue of this document, the BBA requires the manufacturer to confirm the Declaration of Conformity at six-monthly intervals.

Users must satisfy themselves that the system's performance fulfils their requirements and that the systems are being used correctly. Readers are advised to check the current validity of the CE Marking with the Application Guide holder and the validity of this document with the BBA website: www.bbacerts.co.uk
